SUMMARY

Data Science undergraduate at Universitas Negeri Surabaya (GPA 3.61/4.00), two-time 1st-place winner in data competitions, with government statistics experience at BPS Kota Pekalongan. Skilled in Excel, SQL, Python, and Looker Studio for data processing, dashboards, forecasting, and predictive modeling.

EDUCATION

Bachelor of Data Science – Universitas Negeri Surabaya **2024 – Present**

Faculty of Mathematics and Natural Sciences | GPA: 3.61/4.00

- Coursework: Data Mining, Machine Learning, Artificial Intelligence, Data Wrangling, Database Systems, Data Warehousing, Exploratory Data Analysis, Multivariate Analysis

PROFESSIONAL EXPERIENCE

Junior Data Analyst | BPS Kota Pekalongan **June 2026 – August 2026**

- Processed and structured semiannual population data (2020–2025) for 3 kelurahan in Kota Pekalongan, producing 9 thematic tables per area (sex, household, density, growth, age, marital status, blood type, education, religion).
- Calculated demographic indicators in Excel using formulas and pivot tables, including sex ratio, average household size, population density, and population growth.
- Built around 200 charts, dashboards, and publication infographics to support the preparation of Kota Pekalongan's statistical report.
- Compiled and organized SE2026 partner recruitment data to support progress reporting.

HONORS AND AWARDS

1st Place – Data Craft League, MATRIX SAINTAVERS *(HMPS Sains Data UIN K.H. Abdurrahman Wahid)* **2026**

1st Place – Educational Innovation Infographic, DIMAS-TI AMLI *(Asosiasi MIPA LPTK Indonesia)* **2026**

- Turned environmental data analysis into SIMORA, an Edutech concept integrating AI and Digital Twin for interactive learning.

ACADEMIC PROJECTS

NTP Forecasting Central Java | *Competition Project* | Live App **Data Craft League 2026**

- Forecasted Nilai Tukar Petani (NTP) in Central Java from 88 months of BPS data; SARIMA outperformed Holt-Winters and Moving Average (MAPE ≈ 1.16%).
- Built an interactive web dashboard (trend, seasonality, 20-month forecast, what-if simulator) and an infographic poster.

Supermarket Business Analysis | *Course Project* | Live App

- Cleaned 10,494 retail transaction records (2014–2017, 10 cities): removed 417 duplicates and filled missing dates, postal codes, and cities using INDEX/MATCH and VLOOKUP.
- Analyzed sales by city, shipping method, weekday, and product with QUERY and pivot tables to identify top-performing cities and top-5 products.
- Compared Random Forest and Linear Regression for profit prediction (5-fold CV): R^2 0.62 vs 0.17.

AdventureWorks Data Warehouse | *Group Project*

- Built a data warehouse with PostgreSQL, star schema, and ETL processes, and an OLAP cube in Atoti for multidimensional analysis.

SKILLS AND LANGUAGES

Programming & Data: Python, SQL, R, PostgreSQL, Machine Learning, Time-Series Forecasting, Business Analysis, Data-Driven Decision Making

BI & Visualization: Microsoft Excel (formulas, pivot tables), Looker Studio, Tableau, Power BI (working knowledge), Chart.js, Draw.io

Languages: Indonesian (native), English (intermediate)

ORGANIZATION AND CERTIFICATIONS

Dept. of Religious & Spiritual Affairs | HMP Sains Data UNESA **2024 – 2025**

- Managed charity programs for orphaned children, coordinating donation collection and event execution.

Public Relations | PANDAS 2025 (Data Science Community Service Program) **2025**

- Coordinated communication with internal and external parties for community service activities.

Data Science Specialist | Asah Program by Dicoding **2026 – 2027 (ongoing)**

Microsoft Excel Bootcamp | Karirnex Indonesia **2026**

Special Skill Data Analyst Bootcamp **2026**
