

KARTIKA NUR SAVIRA

State University of Surabaya • Surabaya, 60223 • kartikasavira06@gmail.com

SUMMARY

Data Science undergraduate at Universitas Negeri Surabaya (GPA 3.61/4.00) with hands-on experience in government statistics through an internship at BPS Kota Pekalongan, covering data processing, formal reporting, dashboards, and publication infographics. Proficient in Excel and Google Sheets, with dashboard experience in Excel, Looker Studio, and Chart.js and working knowledge of Power BI and Tableau; uses SQL and Python for data consolidation, time-series forecasting, and predictive modeling. Detail-oriented and communicative, with committee and organizational experience coordinating cross-team activities. Open to a 6-month full-time on-site (WFO) internship.

EDUCATION

Bachelor of Data Science - State University of Surabaya
Faculty of Mathematics and Natural Sciences | GPA: 3.61/4.00 **2024 – Present**

- Relevant coursework: Data Mining, Machine Learning, Artificial Intelligence, Data Wrangling, Database Systems, Data Warehousing, Exploratory Data Analysis, Multivariate Analysis

PROFESSIONAL EXPERIENCE

Junior Data Analyst | BPS Kota Pekalongan **June 2026 – August 2026**

- Processed and organized survey datasets using Microsoft Excel, producing structured data for reporting and analysis.
- Compiled statistical data to support the preparation of Kota Pekalongan's statistical report.
- Prepared data-based publication materials using Sakernas labor-force indicators (TPAK, TKK, and TPT).
- Compiled and organized SE2026 partner recruitment data to support reporting activities.

ACADEMIC PROJCTS

NTP (Farmers’ Terms of Trade) Forecasting Central Java| Competition Project | [Result](#) **Data Craft League 2026**

- Built time-series forecasting models for Nilai Tukar Petani (NTP) in Central Java and selected SARIMA as the best model, with a MAPE of about 1.16%.
- Analyzed NTP trends and produced an infographic poster

Supermarket Business Analysis | Course Project | [Result](#)

- Analyzed retail sales patterns to identify top-performing cities, shipping methods, and peak sales periods.
- Developed and compared Random Forest and Linear Regression models for profit prediction.

AdventureWorks Data Warehouse | Group Project

- Built a data warehouse using PostgreSQL, star schema, and ETL processes to organize and consolidate business data.
- Developed an OLAP cube using Atoti for multidimensional data analysis.

ORGANIZATION AND ACTIVITIES

Department of Religious & Spiritual Affairs| HMP Sains Data UNESA **2024 – 2025**

- Managed charity programs for orphaned children, coordinating donation collection and event execution with team members.

Public Relations – PANDAS 2025 (Data Science Community Service Program) **2025**

- Coordinated communication and supported community service activities with internal and external parties.

CERTIFICATION AND COURSE

Data Science Specialist | Asah Program by Dicoding **2026 – 2027**

- Intensive training in data science, analytics, machine learning, and industry-based projects.

Special Skill Data Analyst Bootcamp **2026**

- Analyzed and interpreted datasets through data cleaning, exploratory analysis, and visualization.

Microsoft Excel Bootcamp | Karirnex Indonesia **2026**

- Strengthened data analysis and reporting skills using Excel functions, pivot tables, and data visualization.
